TELENICU

University of Utah Health partners with community hospitals to offer specialized care for newborns. Through secure telehealth technology TeleNICU neonatologists provide real-time consultation and emergent neonatal support alongside your pediatrician and nursing team.

Around the clock access to U of U Health neonatologists ensures each patient receives the highest level of care available.

WHAT ARE THE TELENICU BENEFITS?

- 24/7 neonatologist consultation via secure live video link
- Virtual delivery attendance as requested by your baby's doctor
- TeleNICU connected rapid dispatch of AirMed neonatal transport team — if transport is necessary
- Care collaboration with your baby's doctor to provide excellent, safe care close to home

"We take excellent care of our sick babies here in Vernal. And we do it even better because of our partnership with the U of U NICU via Telehealth."

*Shawn M Cooper, DO
Board Certified Pediatrician
